15153	GREAT BRITAIN - BOOKLETS		1988 In the first half of 1988, tests were started with various ways of dispensing booklets - this was both electrical and mechanical. For these experiments new test material in the form of booklets was needed and these were produced with labels either with or without an overprint of a bar. These labels were on unwatermarked paper, and with the exception of the overprint when this was used, have no other printing (stampboards.com 30/10/2009). Here we have an empty booklet with 'Electical Machine Dummy Booklet for test purposes only' on the cover, printed in grey ink, with no printers name (unlike other booklets). There may have been 4 x poached egg stamps, there are 3 stamp width strips with a thick black vertical line on each. Rarely seen.	US4	£24.00
