

Invest in ^{21st} Facial Recognition Technology (FRT) for Philately - We did: thereby inventing DPR?

6 years ago, we started the journey to Map Perforation – but Only Now, six years later, is it good enough for you to join us ...

The Mission: To create the World's 1st Philatelic automatic Digital Perforation Reader (DPR), powered by FRT on your mobile smart phone! ...

If You struggle with perforation – You can test NEW DPR technology for just £1 (US\$1.30 E1.20)

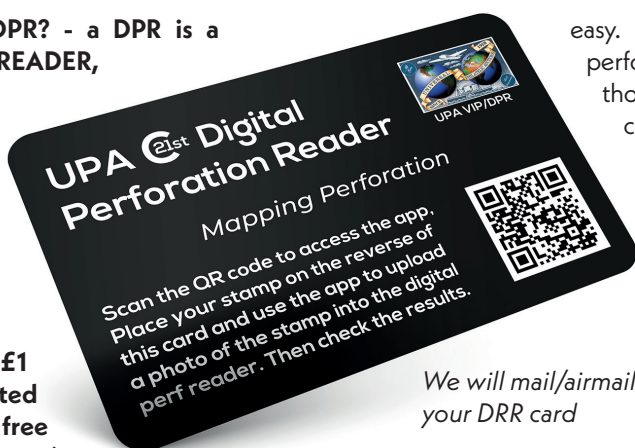

The Vision: An affordable Global Philatelic Resource *Universally* shared by Collectors & Dealers alike: The present: – Privacy (Personal) DPR use, save unlimited images on your device. The future: – and/or publish/share images for Global Philatelic research/collaboration facilitated by *machine learning* and ubiquitous 'A I' upon the World Stamp Monitor resource philatelic platform. This is the vision as more and more collectors join, but let's not get ahead of ourselves on the present journey! ...

Say that again - What is DPR? - a DPR is a DIGITAL PERFORATION READER, but a DPR is not a physical object, because it's a web-app on your Mobile Phone, enabled by the DPR card we'll mail/airmail you when you REGISTER **(To Start now USE QR CODE ⇨)**

The Deal: For just £1 Registration, 30-day unlimited use Free Trial. (After your free trial it's £2.49 (US\$3.30, E2.95) per month used so you're not paying when you're not using it, or seamlessly pocket TWO months FREE ... it's just GBP£24.95 (US\$33, E29.50) per annum charged to your card ...

GETTING STARTED: You'll need to register for us to mail/airmail you your Digi-Perf-Reader (DPR) card. You'll need it for your DPR web-app. to work. Your card is bio-degradable, so it won't harm the environment, we'll mail/Airmail your DPR card POST-FREE for just £1 (US\$1.30 E1.20) registration fee with unlimited use 30-day free trial

OK, let's get on with the story: 'Perfs' are a 'Faff' aren't they?! Whereas for some, the fortunate few – they're

We will mail/airmail your DRR card

easy. But for many, if not most, perforation is difficult to align and those 'dot-perforation-guides' can prove an investment in self-delusion. Unsurprisingly, as we all get older ... there are literally tens of, if not hundreds of thousands of collectors worldwide out there who deliberately choose to ignore perforation. It is nobodies' fault perforations are prohibited for them because,

obviously 'perfs aren't easy,' are they?

Some collectors and even battle-hardened dealers spend their entire working lives ignoring them, or simply making blind perf-susptions! Time and again we see it written in collections – 'RARE PERF'... **but 9 out of 10 x it simply isn't, is it?!** It's a shame because we are missing out arguably upon one of the most under-explored areas in Philately today – an area which is unrecognised by many, ... *potentially one of the most profitable philatelic areas for the few, until now ...*

The point is that since perforation measurement was first identified and catalogued some 100+/- years ago – where only one perf variant is known, nobody has needed to
